**March 2017**

## **Introduction**

The following summarizes odor complaints received and odor surveillance activities during 2016 related to Rumpke Sanitary Landfill located at 10795 Hughes Road in Colerain Township.

Beginning in 2007, Hamilton County Public Health (HCPH) collaborated with Rumpke and Southwest Ohio Air Quality Agency (Air Quality) to respond to citizen complaints 24/7. Since 2007, HCPH has compiled odor complaint data into periodic reports. The intent of these reports is to summarize and analyze the complex issue of odors and odor complaints at Rumpke Sanitary Landfill.

The subsurface heating event affecting the north end of the facility (Phase 5) created unique challenges for the facility to strictly control odors beginning in 2009. Continued analysis of the data is valuable in measuring the effectiveness of odor control efforts undertaken by the facility.

New since 2013, HCPH has used mobile devices to capture complaint investigation data. This was necessitated by the increase in odor complaints. Electronic data capture eliminates the need to perform data entry of paper records allowing staff more time for field responses and odor surveillance. Utilizing GPS-enabled mobile devices, geospatial data is now collected alongside the observations allowing for better mapping capability.

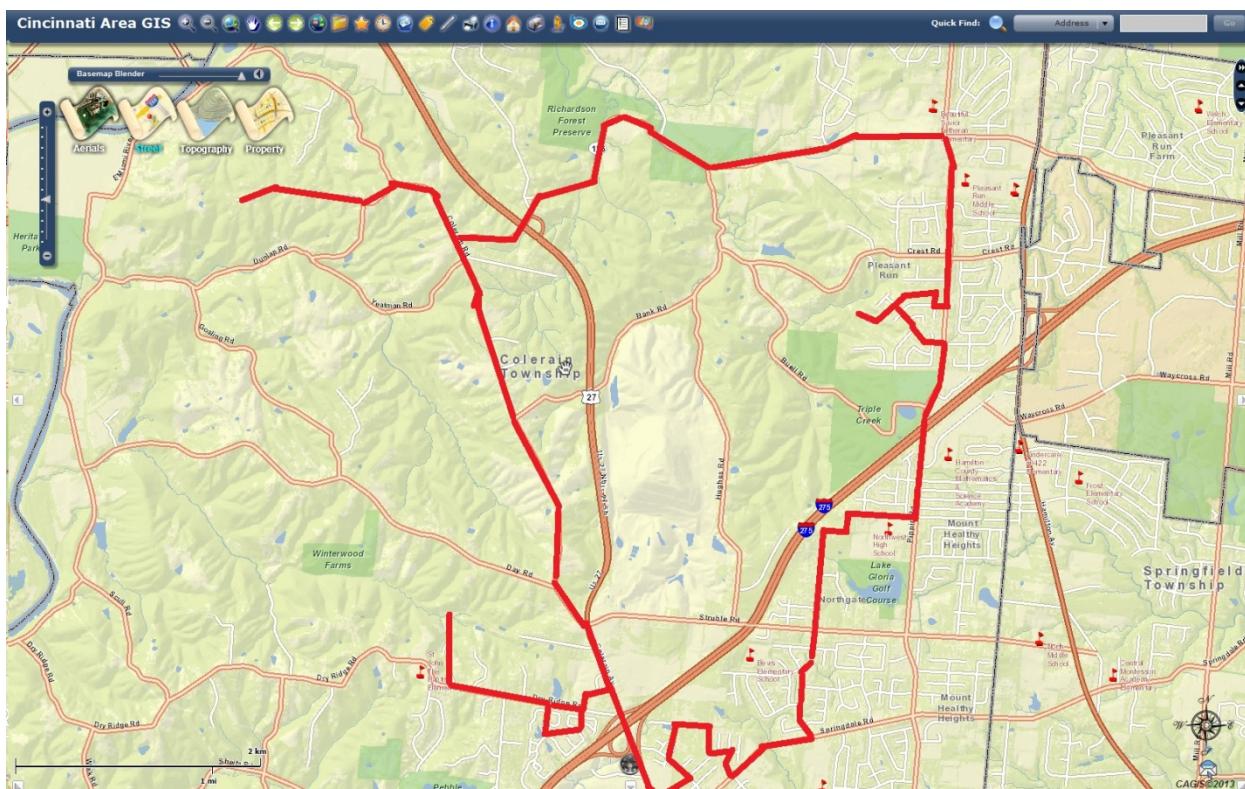

In addition to complaint response, HCPH conducts odor surveillance monitoring of the facility in accordance with Ohio Environmental Protection Agency (OEPA) Internal Operating Procedure and Odor Scale outlined below (Figure 1). A surveillance loop has been established based on complaint locations from 2015 (Figure 2). This route includes major roadways surrounding the facility through residential areas. An assessment of odor is made at all points along this loop, however only incidences of landfill-related odor and complaint locations are recorded. Periodic joint inspections with OEPA are conducted to "calibrate" assessment of odor and ensure consistency in applying the odor scale from Figure 1. The assumption can be made that if the surveillance loop was performed, no landfill-related odors were noted at all points along that route except where noted. Each record in the dataset is either a complaint location, a location where landfill-related odor was noted by the investigator, or a record that no odor was noted along the surveillance route.

Every complaint continues to be relayed to Rumpke for investigation – results of Rumpke's investigation are not currently included in this dataset. Only HCPH investigation results are being recorded. Also, in order to streamline data capture and analysis, complaints are logged and tracked separately from the investigation or field responses.

**Figure 1****Odor Scale from OEPA Internal Operating Procedure**

No Odor	Odor Not Detectable
Slight	Odor present in the air, which activates the sense of smell and the characteristics may or may not be distinguishable and/or definite, but not objectionable in short durations. This is characterized by occasional "whiffs" of odor, but is not persistent.
Moderate	Odor present in the air, which easily activates the sense of smell, is very distinct and clearly distinguishable, tends to be objectionable and/or irritating, and is persistent in the community.
Strong	Odor present in the air, which is objectionable and causes a person to attempt to avoid it completely.
Over-Powering	Odor present in the air, which is so strong that it is overpowering and intolerable for any length of time.

\*Increments have been added to allow description of odor between the criteria described above (No Odor to Slight, Slight to Moderate, etc.).

**Figure 2**

## Results

Table 1		RUMPKE ODOR - DATA COMPARISON 2007 - 2016									
		2016	2015	2014	2013	2012	2011	2010	2009	2008	2007
Complaints	# of Complaints Received	336	314	223	420	500	566	437	121	106	56
	# of Different Complainants - name given	58	76	66	94	108	121	266	28	27	17

	% Anonymous Complaints	21	15	7	11	13	41	37	45	44	0
	% of Complaints from Frequent Complainant	44	37	34	47						
	% of Complaints at Residences	50	58	39	73	74	54	57	47	58	30
	% Involving Deodorizer	8	17	31	22						
% Confirmed	By Responder in Vicinity	ND	ND	ND	ND	80	94	94	66	77	30
	By Responder at Complaint Location	13	18	21	16	27	45	33	28	24	ND
Responder Observations	% of Days Observations Made	55	53	60	55						
	% of Observed Days with No Odor Noted	14	24	35	30						
	% Observed Days with Odor Noted	86	76	65	70						
	% Gas Odor	39	55	59	68	54	42	52	32	20	ND
	% Garbage odor	58	43	39	30	5	4	9	36	55	ND
	% Mixed odor	2	2	2	1	41	51	39	32	25	ND
	% Leachate odor	1	0	0	1	0	3	ND	ND	ND	ND
Response Time	% with Intensity described as greater than slight	4	4	1	3						
	% Less than one Hour	23	22	22	20	94	92	84	76	84	ND
	% Less than four Hours	45	40	52	39						

Notes: ND= No Data, 2013 to current does not include Rumpke response data.  
Frequent Complainant is defined as having reported 10 complaints or more in one calendar year.

In 2016, 336 complaints were received regarding odor from Rumpke Sanitary Landfill. This is slight increase from 2015, but still down considerably from a peak in 2011 of 566 complaints. There were 58 named complainants in 2016, down from of a peak of 266 complainants in 2010. 21% of the complaints were made anonymously, up from 15% in 2015. Complaints were received on 42% of the days in 2016, very similar to 2015 (corrected) and 12% lower than 2013. The percent of anonymous complaints over a two year period is double that of the previous two year period.

The number of frequent complainants is notable, with as few as 3 complainants representing over one third of complaints in 2014. In 2016, there were 10 complainants representing 44% of the complaints.

50% of the complaints were at the caller's residence in 2016, down from 2015 where there were 58%. 13% of all complaints were confirmed at the complainant's location; down from 18% in 2015 and 21% in 2014. The majority (58%) of confirmed off-site odors in 2016 were garbage related. This highlights a 4-year trend of decreasing gas odors and increasing garbage odors confirmed off-site. The average percent of complaints responded to within one hour is 23%. 45% of the complaints were witnessed by HCPH within 4 hours of receiving the complaint in 2016.

With increased capabilities in data capture and better presence at and near the landfill to assess odor, new indices are possible since 2013. The performance indices in Table 1: % Days with Odor Noted and % Days with Intensity Described as Greater than Slight, were developed in 2013. The percent of days with odor noted increased from 76% to 86% from 2015 to 2016 respectively. The percent of days with odor described as greater than slight remained steady at 4%.

Complaint Location	Odor Intensity (No Odor - Moderate to Strong)						Total	Percent
	No Odor	No Odor to Slight	Slight	Slight to Moderate	Moderate	Moderate to Strong		
No	18	87	79	5	1	0	190	36%
Yes	294	24	16	2	0	0	336	64%
Grand Total	312	111	95	7	1	0	526	100%

The response/surveillance dataset for 2016 contains 526 observations or records. 336 records are in response to complaints. 190 of these records were non-complaint locations where landfill odors were observed along a pre-defined surveillance route. 18 records are from surveillance activities where no off-site odors were noted along the surveillance route.

<b>Number of Complaints (All)</b>	<b>336</b>	Percent
Strictly Landfill Odor Complaints	309	92%
Complainant described deodorizer in complaint	27	8%
Complainant described strictly deodorizer	12	4%

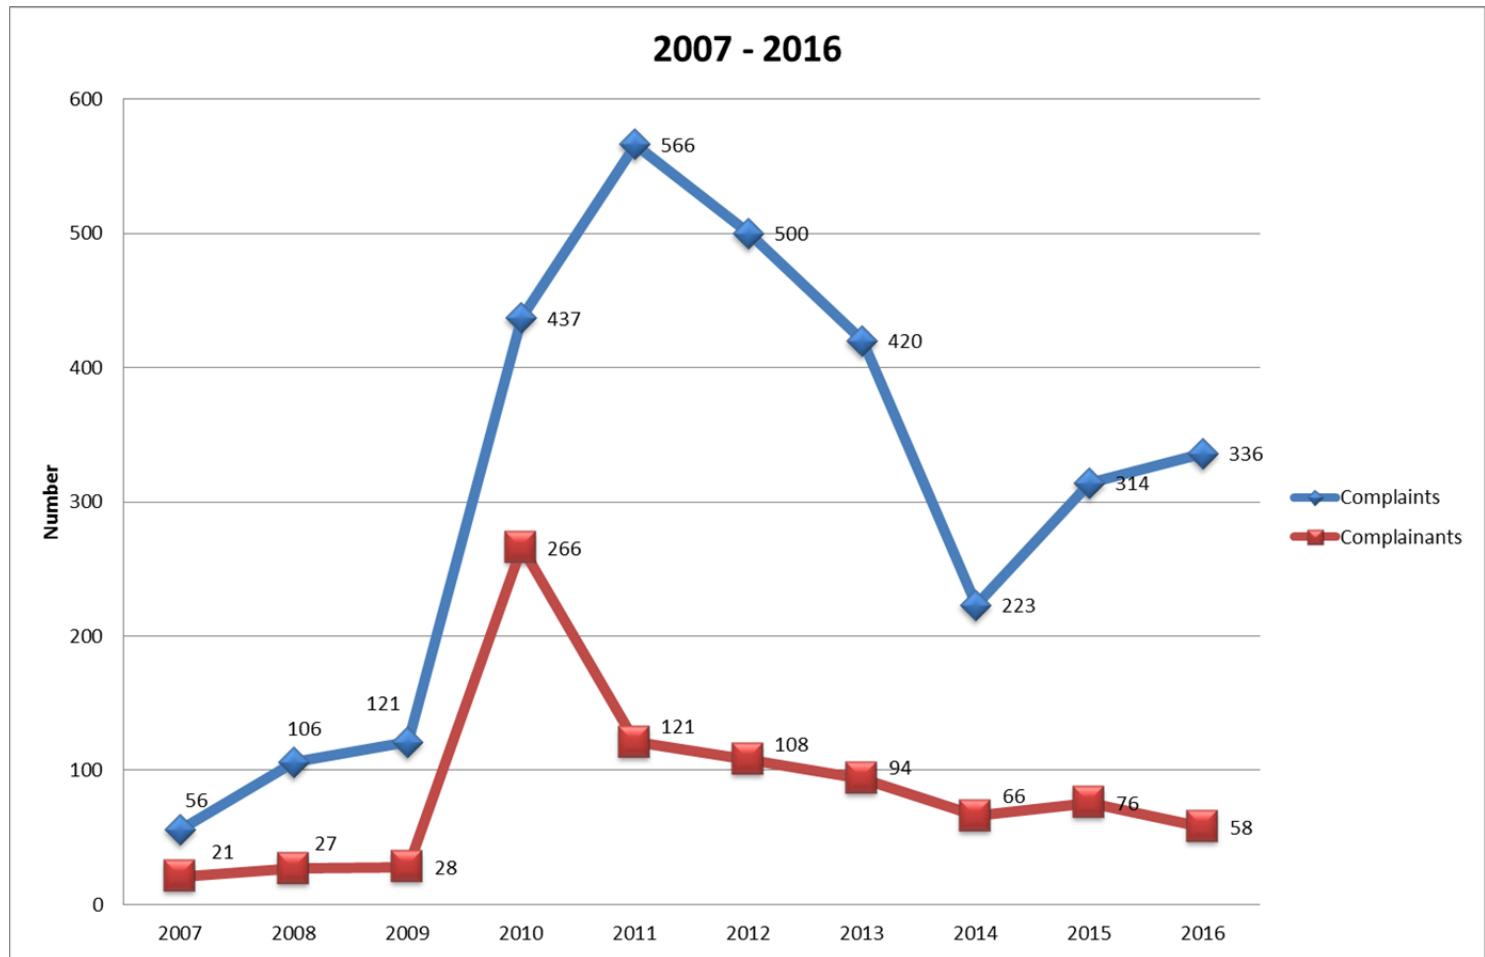

Rumpke utilizes deodorizer as part of the odor control plan. Some residents have complained about the use of this deodorizer. In 27 of 336 complaints (8%), the complainant described the offending odor as involving the use of deodorizer. This is down from 31% in 2014, as indicated in Table 1.

Deodorizer Observed	Odor Intensity (No Odor - Moderate to Strong)						Total	Percent
	No Odor	No Odor to Slight	Slight	Slight to Moderate	Moderate	Moderate to Strong		
No	307	85	75	6			473	90%
Yes	5	26	20	1	1		53	10%
Grand Total	312	111	95	7	1	0	526	100%

The presence of deodorizer was observed by HCPH during 10% of the observations, generally observed with accompanied landfill odors demonstrating conservative use.

Direction Wind is From - Confirmed Odor Type	Garbage	Phase 5		Mixed	Total
N	14				14
NE	24		11	1	36
E	17		15	1	33
SE	9		14	1	24
S			12	1	13
SW	10		19	1	30
W	24		10		34
NW	26		3	1	30
Grand Total	124		84	6	214

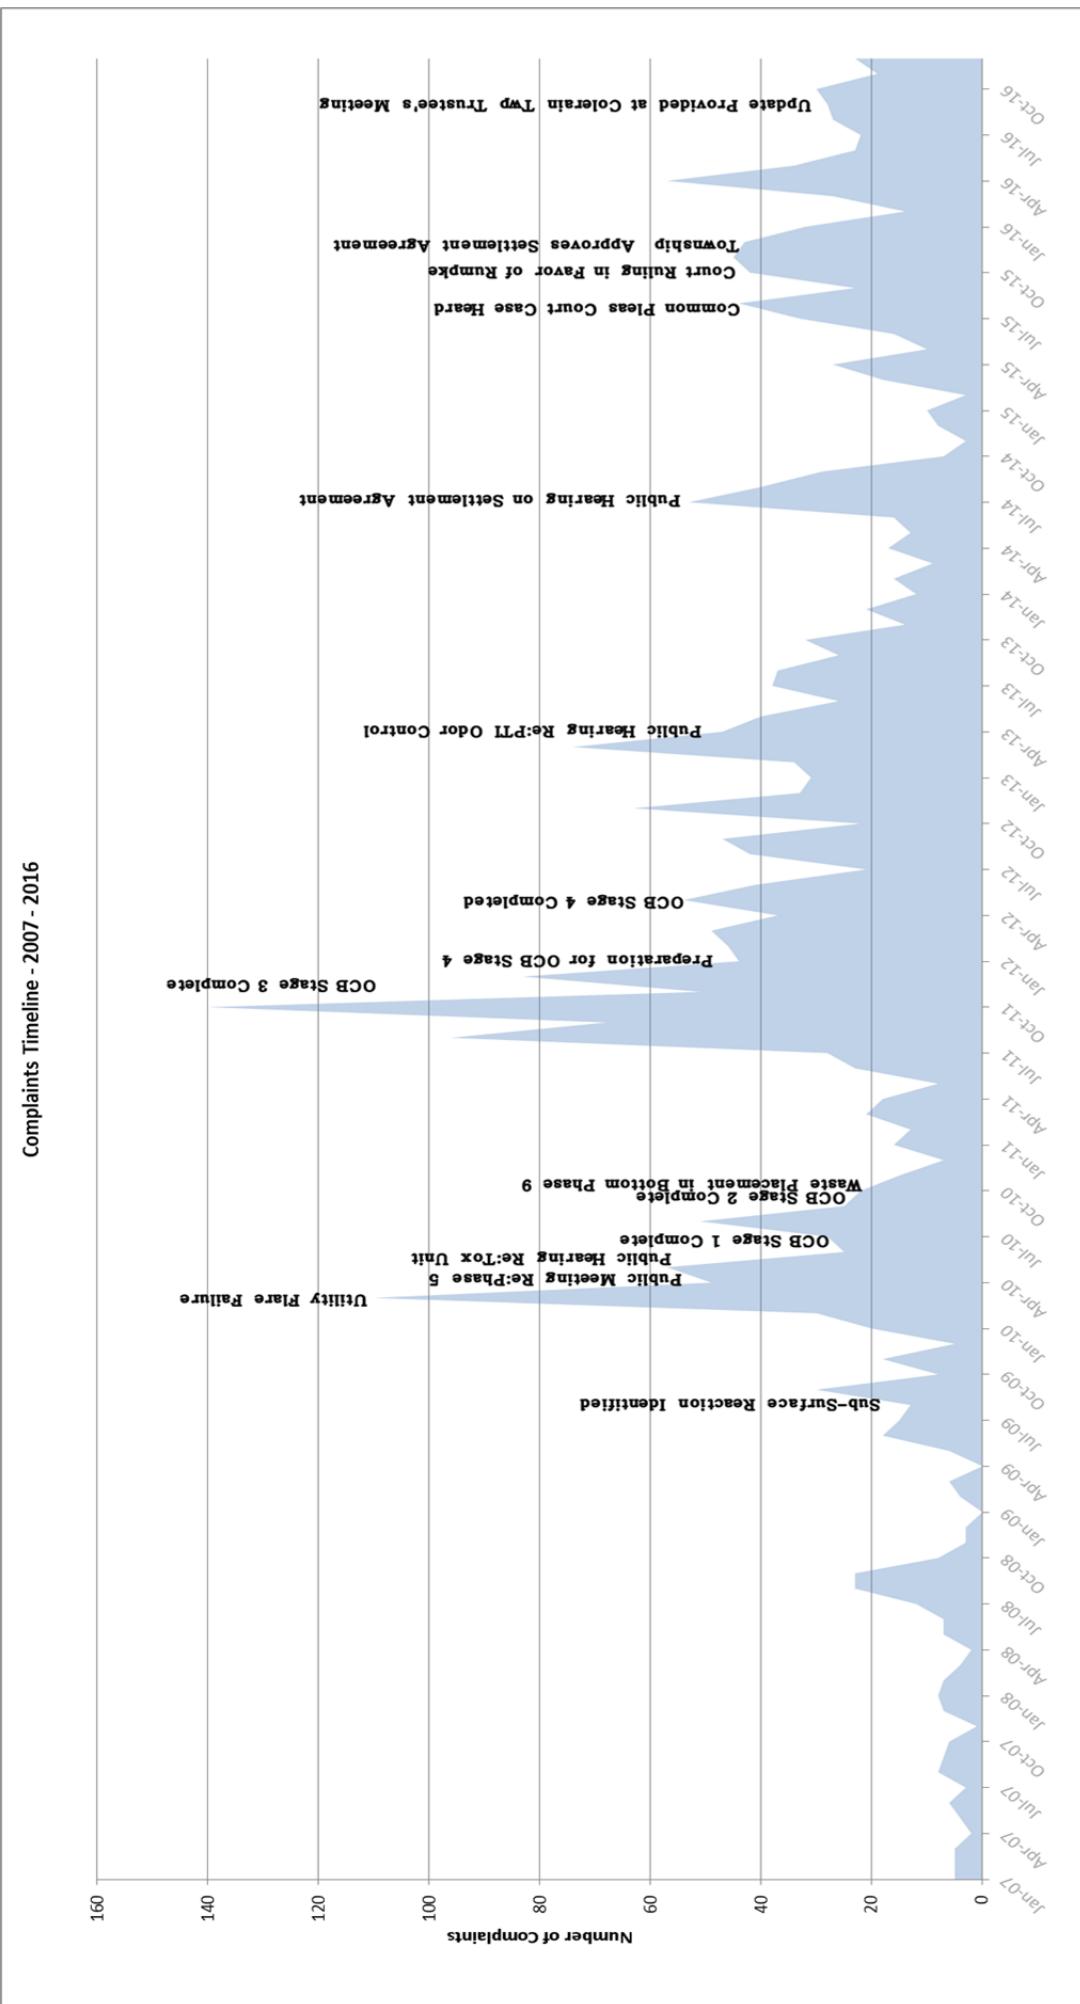

Of the collected weather condition data, wind direction appears to be most useful in predicting type of odor and potential offsite odors being carried to complaint locations. Off-site phase 5 odors are least likely when winds are out of the north. Garbage odors are least often observed off-site when winds are out of the south.

Over the past 10 years there has been a rise and fall in odor complaints. This is primarily due to the sub-surface reaction occurring on the north end of the facility since 2009. In 2016, there were 22 more complaints than 2015 a 7% increase, but the 6 year trend continues to be downward from the peak of 566 in 2011.

The number of complainants reached a peak in 2010 with 266 individual named callers and has been on a steady decline, which indicates fewer complainants calling in more often.

The following timeline graph indicates possible influencing factors (internal and external to the site) on number of complaints from 2007 to 2016. In 2016 there was an unexplained spike in April, higher than the normal increase experienced when winter breaks to spring. In September there was a peak possibly associated with an update provided to at a Colerain Township Trustee's meeting.

The timeline graph reveals some possible influencing factors in the peaks and valleys of complaints.

## **Maps**

Three maps are included as an attachment to this report.

1. Complaint Locations – 336 complaint locations in 2016 with color indicating type of odor and number tag indicating description of intensity.
2. Confirmed Complaint Locations – confirmed complaint locations in 2016 with color indicating type of odor and number tag indicating description of intensity.
3. All Confirmed Odor Locations - with color indicating type of odor and number tag indicating description of intensity.

## **Summary:**

In 2016, there was a 7% increase in complaints over 2015, however there is an overall improvement in the odor situation at Rumpke Sanitary Landfill over the past 5 years. The sub-surface event occurring in the north end of the landfill contributed to off-site odors beginning as early as September 2009 and continues to be a significant source for many off-site odor occurrences. A comprehensive action plan to address odors and return operations to normal in the affected area continues to be implemented.

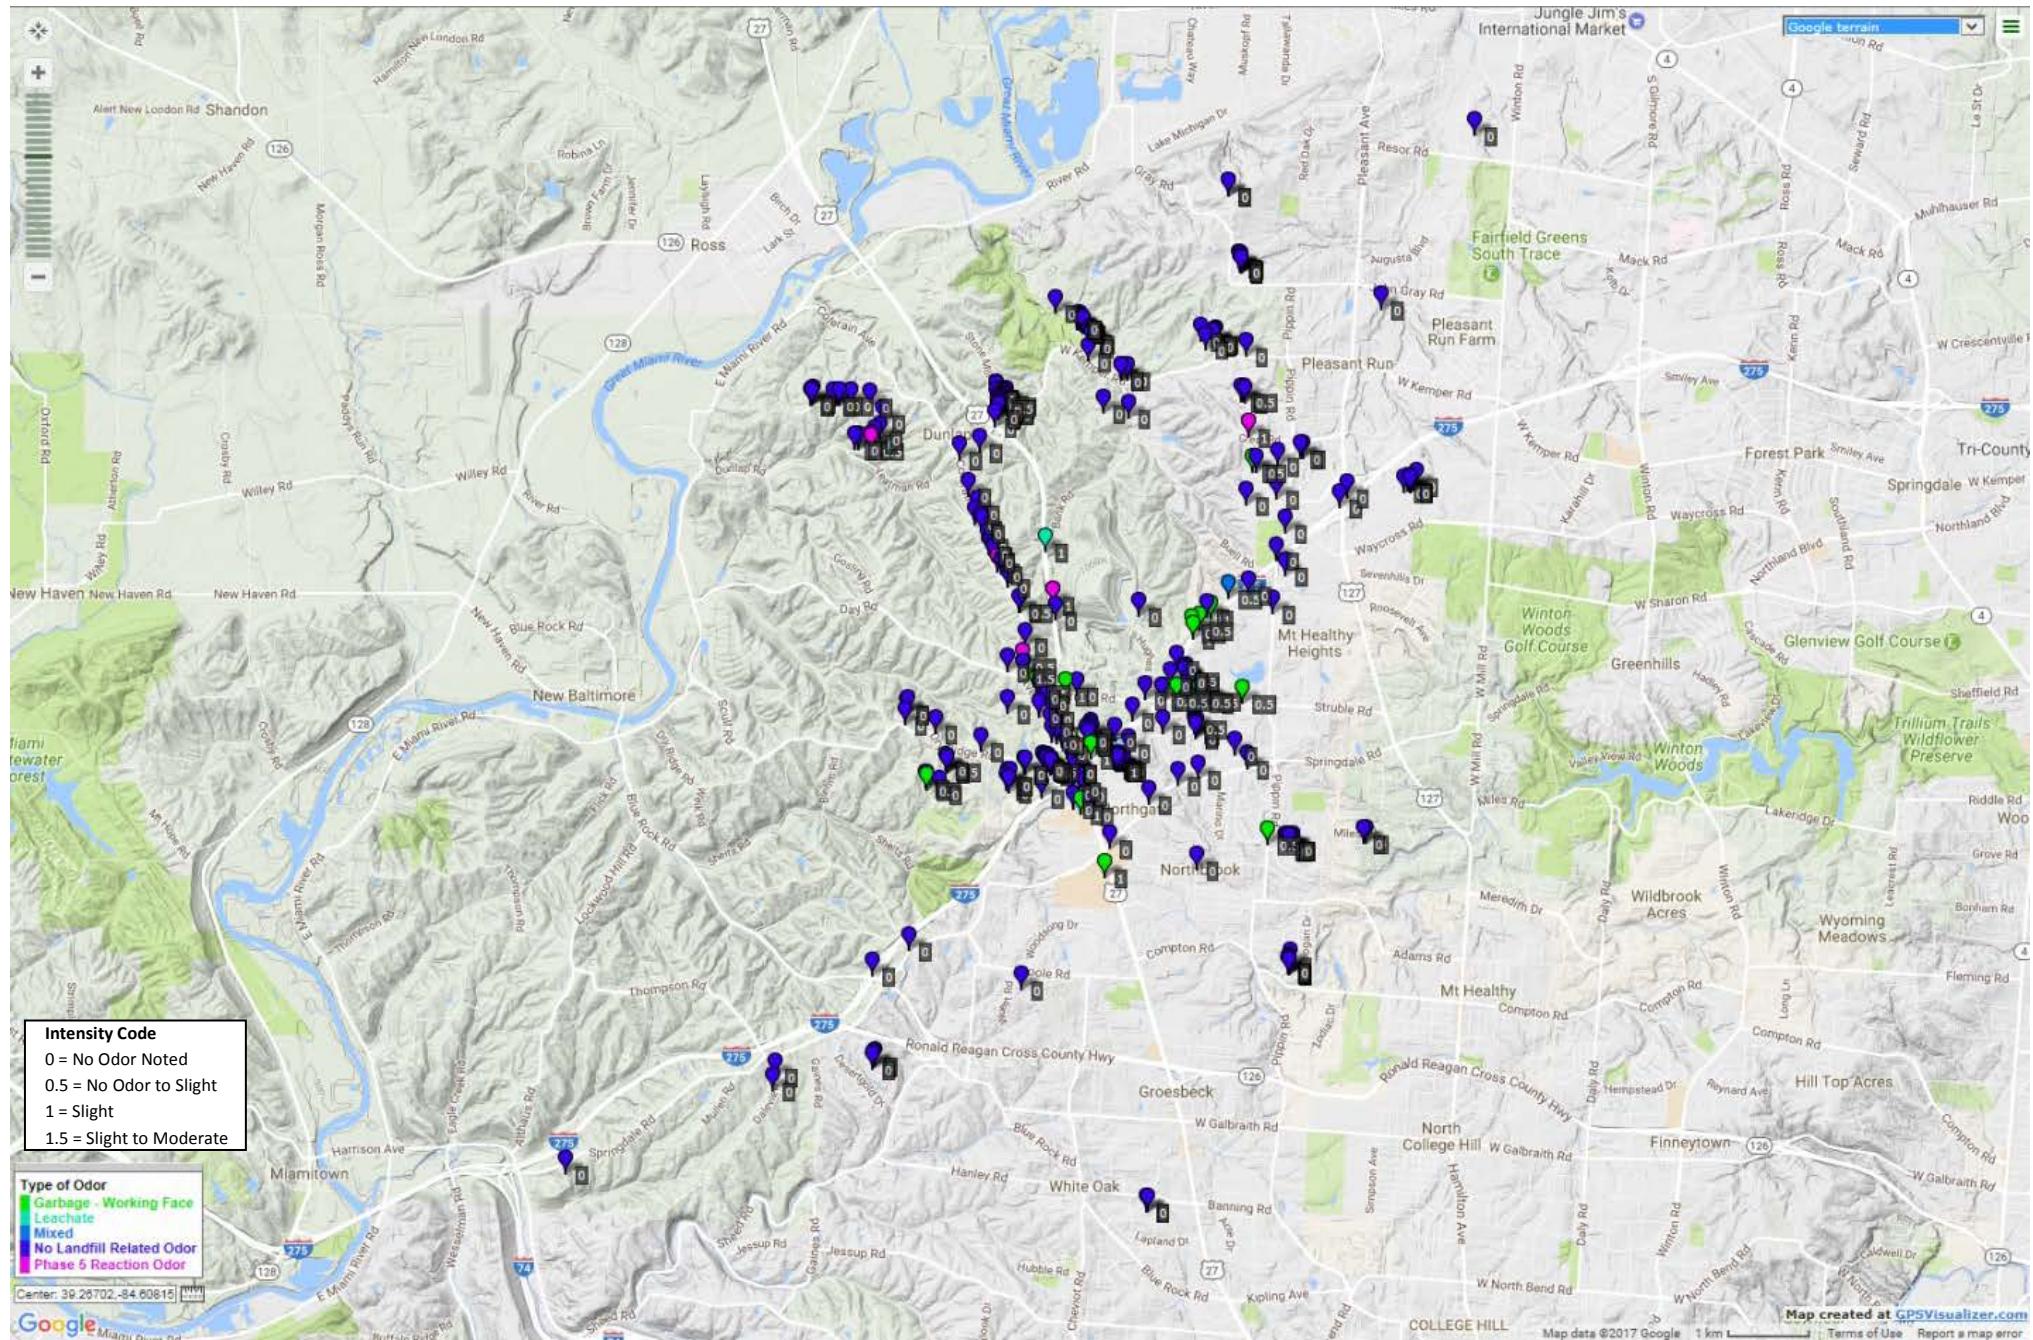

A higher percentage of garbage related odors was observed off-site for the first time in seven years. This could possibly be tied to better containment of gas odors on the north end. In addition, the deodorizer has been reformulated with less of a “top note” in response to deodorizer complaints, making it easier to distinguish garbage odors. Though permitted to use a stronger deodorizer formula, an attempt is being made to prevent deodorizer complaints. A formal Odor Control Management Plan addressing the affected area and other sources of odor from the landfill continues to be utilized by the facility.

Rumpke has taken action to address odors by expanding gas collection and flare capability, applying an Odor Control Blanket (OCB) over the affected area - which has been reapplied on 51 acres with an odor impermeable membrane (EVOH – Ethyl Vinyl Alcohol), continued repairs of tears and leaks from the OCB and gas collection systems, eliminating odorous leachate from residential sewers, and numerous odor neutralizing delivery systems.

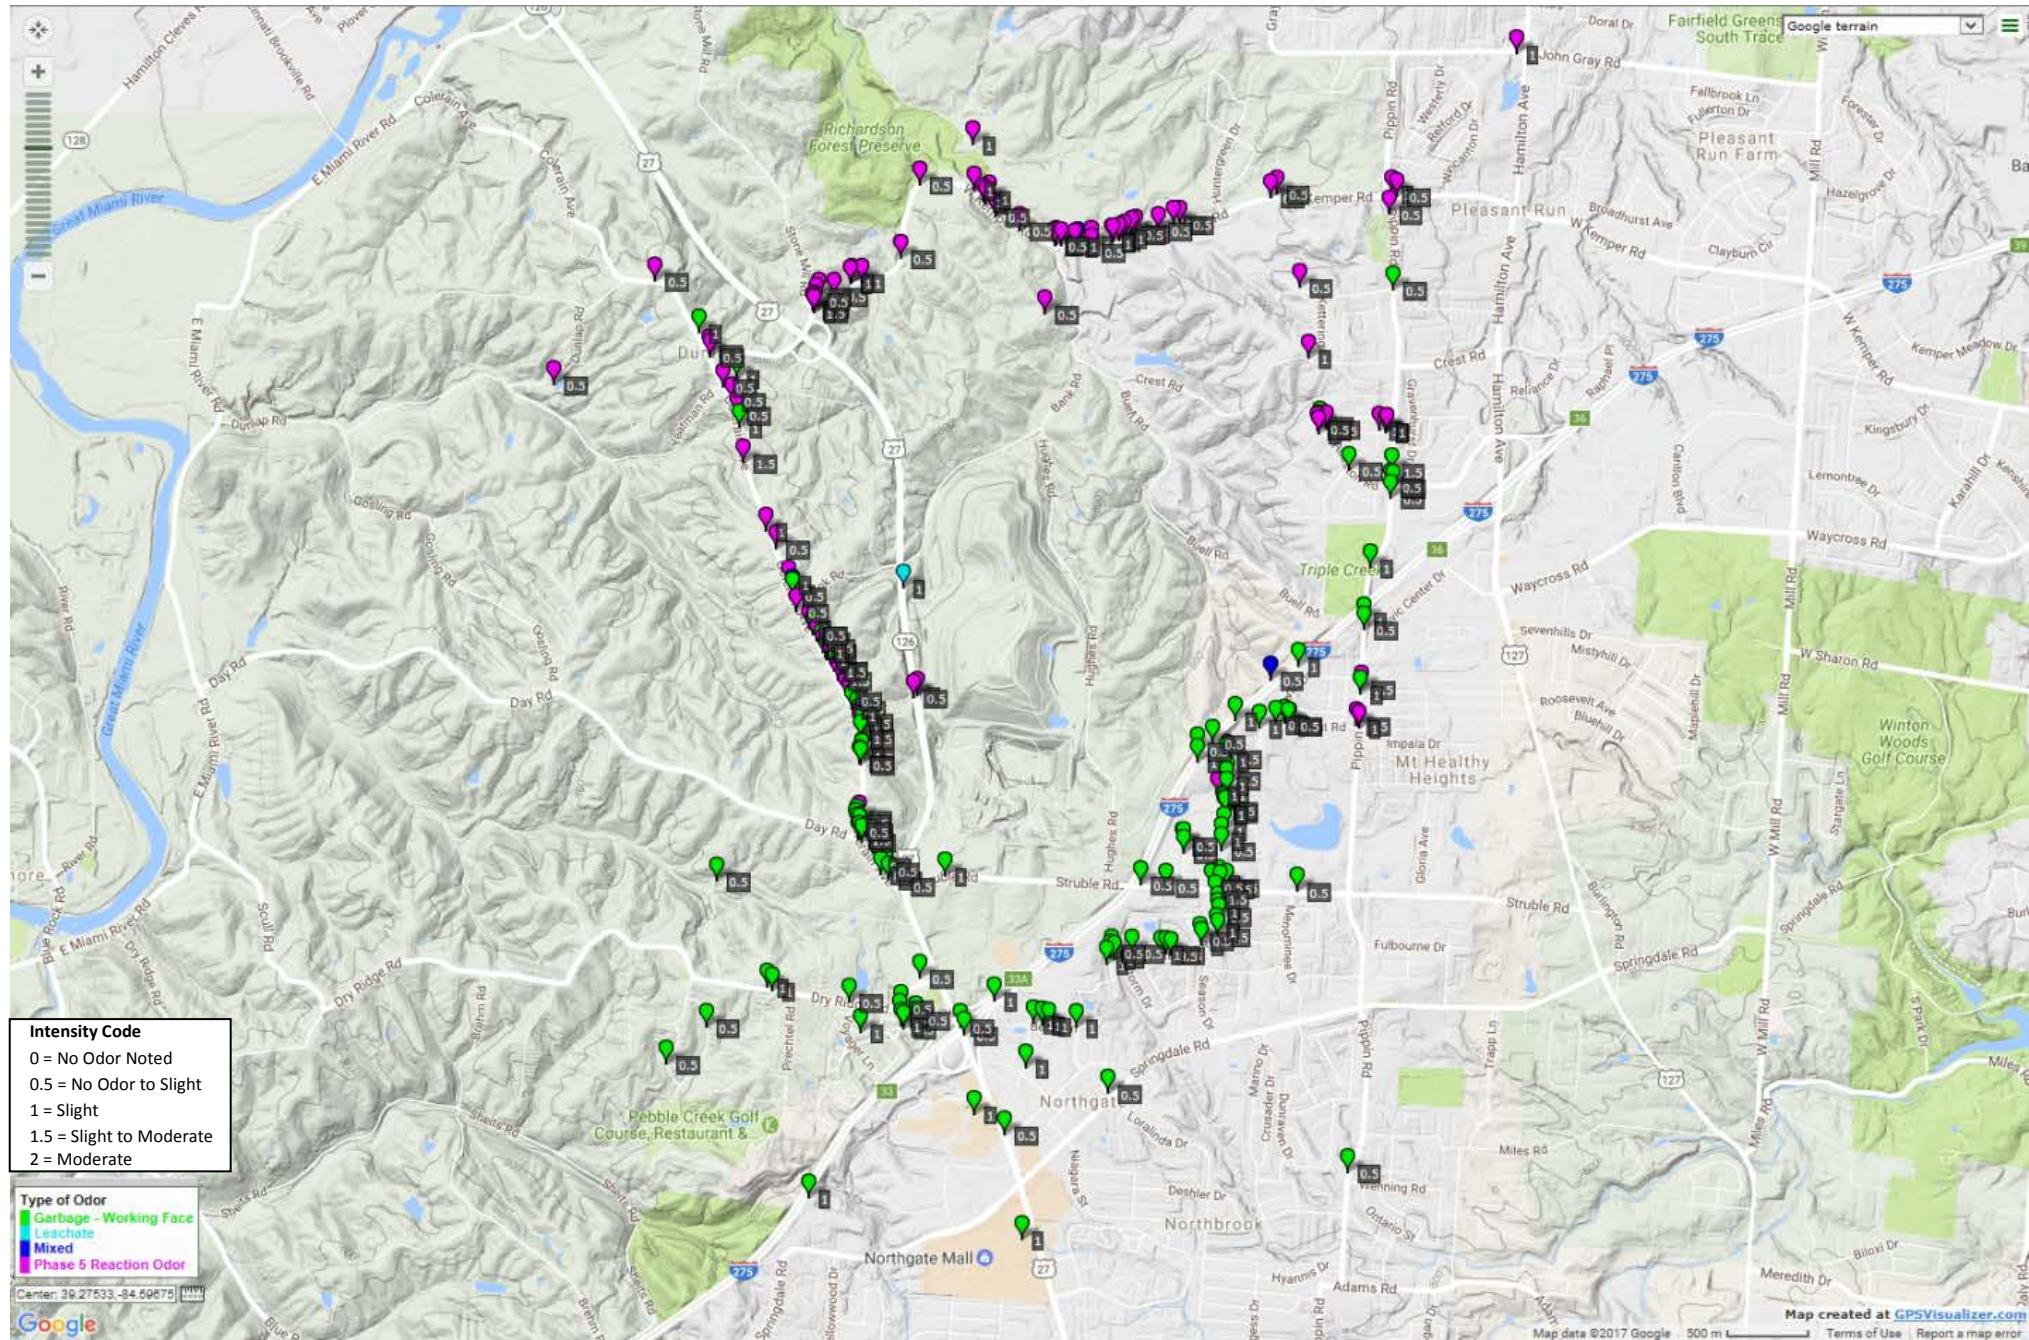

In 2016 there was continued work from 2015 that required the temporary removal of OCB in portions of phases 6 and 7 to make necessary repairs to the leachate collection system.

Hamilton County Public Health continues to work with Rumpke personnel and other agencies to identify measures to minimize the occurrence of off-site odors as much as possible. Additional efforts and odor control technologies continue to be evaluated to better target identified odor sources. Unannounced inspections and odor surveillance continue in order to monitor the facility. Periodic joint inspections between agencies are conducted to “calibrate” assessment of odor and ensure consistency in applying the odor scale from Figure 1. The 24-Hour Odor Complaint Hotline and complaint response continues to allow for the rapid investigation of odor complaints associated with Rumpke Sanitary Landfill.

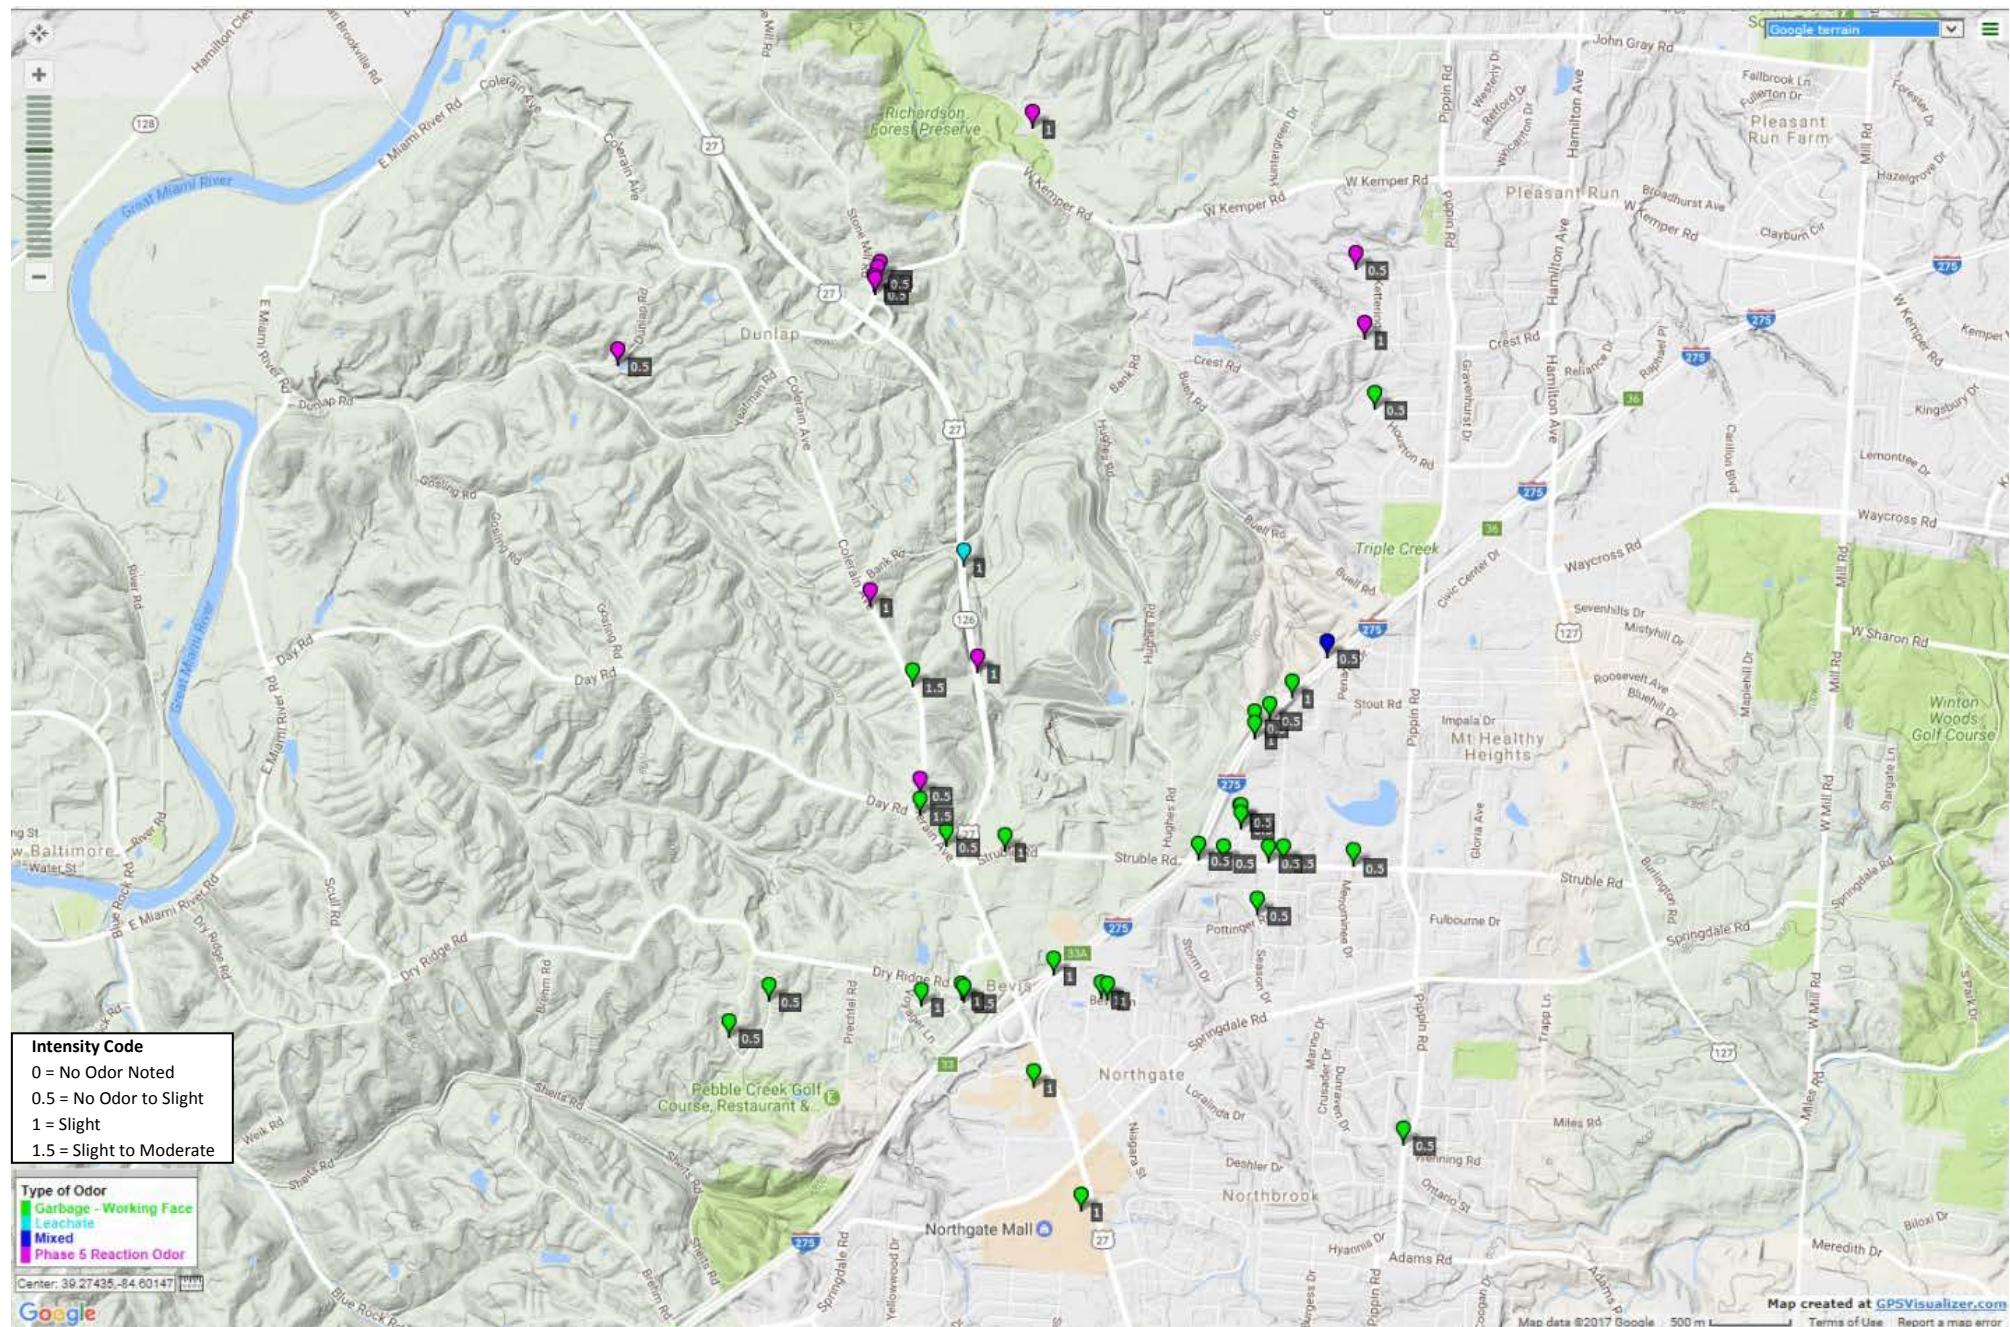

# 2016 Complaint Locations

# 2016 All Confirmed Odor Locations

# 2016 Confirmed Complaint Locations

**2016 - Year**

Number of Complaints-Includes Deodorizer	336
Number of Observations (complaints + surveillance)	526

## **DAYS**

	Number	Percent
Day of the Year (out of 365)	366	100%
Days with Complaints (out of 366)	155	42%
Days with Observations (out of 366)	200	55%
Observed Days with no odor noted	28	14%
Observed Days with odor noted	172	86%
Observed Days with odor noted greater than slight	7	4%
<b>On days of observation the type of odor observed</b>		
Observed Days with Garbage Odor (out of 200)	93	47%
Observed Days with Phase 5 Odor (out of 200)	75	38%
Observed Days with Other Odors (gas, leachate, mixed)	4	2%
