Operation (yrs): Approximately 1990 – 1996 (based on aerial photos)

FACILITY OVERVIEW

In June of 1993 the health district issued a letter to Merle Bevis regarding the landfill. The letter refers to the landfill as a C&DD landfill but indicates illegal disposal of solid waste is occurring. The letter requires removal of the solid waste (rubber cones, tar paper, cardboard tubes, mattresses, general trash, and brush). Numerous inspection reports were completed at the site from July 1993 to September 1996. The inspections noted mostly

clean hard fill with some C&DD and only incidental solid waste. In late 1996 the facility began taking only clean hard fill and stopped accepting C&DD.

Review of ODOT aerials shows no fill activity occurring at the site in 1976. The residence northwest of the fill is present by 1980. Figure 3.2.3-A from 1986 shows a small area of filling occurring in the southwest corner of the approximate limits of fill. By 1992 (Figure 3.2.3-B) a large area of fill is visible. Figures 3.2.3-C and 3.2.3-D show the progression of filling in 1996 and 2009 respectively. Filling with clean hard fill continued until approximately 2015.
