This summary is provided solely for informational purposes and does not constitute a part of, or otherwise affect, the attached license.

### **Special License Terms and Conditions**

- 1) The facility has entered into an agreement or been issued director's final findings and orders with respect to groundwater monitoring.
- 2) The facility shall provide courtesy copies of groundwater related correspondence/reports to the Health District.
- 3) The Facility shall follow the Fire Prevention Plan as submitted and approved by the Health District (received July 7, 2010). The exposed combustible waste materials will be completely covered at the end of every month with noncombustible material. Cover shall be reapplied in the former working face areas as necessary to prevent exposure of C&DD materials.
- 4) The Health District is to be notified in writing before the Facility intends to accept any fly ash, bottom ash, or spent foundry sand. The notification shall include the origin of the material and toxic characteristic leaching procedure results when appropriate. The Health District will notify the Facility of the Health District's approval in writing.
- 5) The Facility shall continue to pick solid waste from the unloading zone prior to pushing into the working face. All solid waste received by the Facility is to be rejected, removed, and properly disposed. Debris that has been spread, compacted, and buried or partially buried will be considered accepted for disposal.
- 6) The Facility shall remove and properly dispose of solid waste containers to avoid causing a nuisance or health hazard. Full containers of solid waste shall be removed from the facility within 7 days.

- 7) The Facility shall monitor the landfill for standing water and re-grade to promote positive drainage.
- 8) In order to demonstrate compliance with OAC-3745-400-11(B)(2), and in accordance with OAC-3745-400-11(D), the Facility shall install and/or maintain professionally surveyed markers that clearly delineate the Active License Disposal Area (ALDA) as approved for the facility's current license year. The number of markers and materials used must be acceptable to the Health District. For example, painted bollard poles or 2'x2'x6' concrete blocks marking the corners of the ALDA with intermediate posts or stakes providing a line-of-sight boundary line would be acceptable. Surveyed marker coordinates are to be recorded and submitted to the Health District.
- 9) The Facility will immediately notify the Health District in the event of any fire or other abnormal situation involving the landfill by calling 513-946-7879.
- 10) With respect to Financial Assurance Closure Cost Estimates, the Total and Construction ALDA spreadsheets, for line items F (Pre-cap Grading of Waste) use the unit cost of \$522.00 per acre which is considerably lower than OEPA's reference cost of \$2000.00 per acre for this task. The lower than reference cost estimate is acceptable as long as current grades do not change in a way that will increase the pre-cap grading cost.

If during the course of this license, grades are found to have changed in a way which will increase the pre-cap grading cost, the facility will be notified to revise the estimate and corresponding financial assurance obligation.
