

SAFE Services Program Report

Supplies Distribution
(Data current as of: September 29, 2023)

9/25/2023
Multiple values and Null

****Due to necessary maintenance, the data dashboards will not be available for 3 weeks. Until these updates are complete, the reports will be posted to the website in PDF format under Additional Reports. Thank you for your patience during this temporary change.****

The Supplies Distribution page of the SAFE Services Program (SSP) Report uses three graphs and a map to show data related to visits, supplies distribution/return, and service locations. The bar graphs show volumes of fentanyl strips and Narcan doses distributed by each Service Location. The Syringe Distribution and Return chart initially displays an overall count of syringes distributed and returned across all service locations, with the ability to filter by a specified Service Location. The Client Visits map shows the volume of visits by clients' home residence zip codes, as well as pinpoints the exact coordinates of each service location.

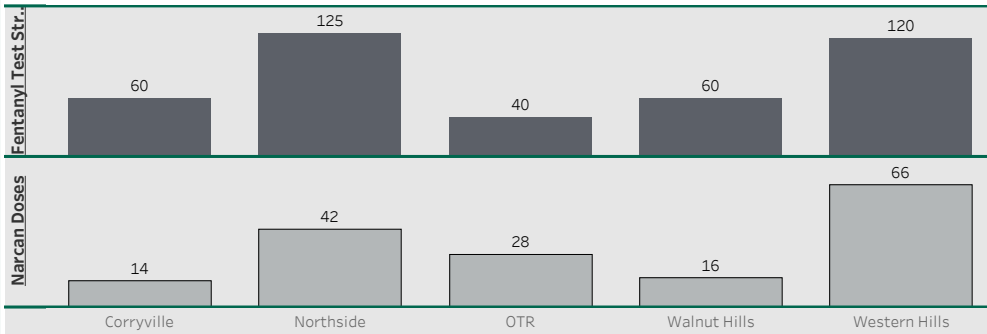

Step 1: Use the Select Date Range control to adjust the dates. Use the scroll bar to change the dates. You may also click on the date to bring up a calendar. The default setting is to include data from the previously completed week. ..

1. Select Date Range
9/25/2023 to 9/29/2023
and Null values

2: Select a Service Location (Corryville, Northside, etc.).

■ Fentanyl Test Strips Distrib...
■ Narcan Distributed

Client Visits	Corryville	Northside	OTR	Walnut Hills	Western Hills
	53 (16.99%)	99 (31.73%)	46 (14.74%)	37 (11.86%)	77 (24.68%)

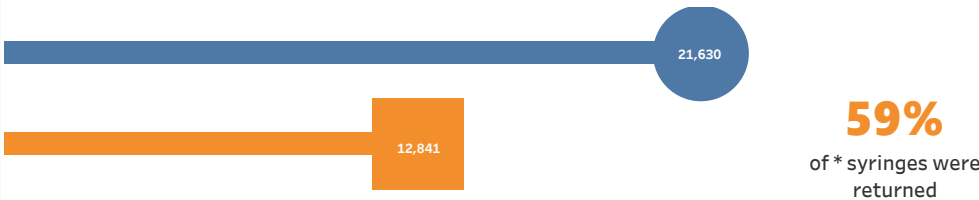

Supplies bar charts show the volume of Fentanyl Test Strips (40 to 125) and Narcan doses (14 to 66) for each Service Location. Service Location is on the x-axis. Volume of supplies is on the y-axis. The data is filtered on Date Range, which is set to include the previously completed week, but can be adjusted. Each Narcan kit contains two doses.

Syringe Distribution and Return
