TRANSPORTATION AVAILABLE FOR COVID-19 VACCINATIONS

As Ohio begins offering COVID-19 vaccinations to older adults, many individuals will need assistance getting to and from vaccination sites. Council on Aging (COA) and home52 Transportation can help.

Using COA's network of transportation providers, home52 Transportation can coordinate and provide appropriate transportation to adults age 60+ who are unable to get to a vaccination site.

How it works:
- Vaccination providers notify home52 Transportation when a patient needs transportation
- Older adults may also call to request transportation assistance
- Transportation will be provided regardless of enrollment status in a COA program
- Transportation can be provided for both the first and second vaccination dose
- When a request is submitted, home52 Transportation coordinators will follow up with the older adult within 24 hours to arrange appropriate transportation
- Transportation is paid for via COA and home52 Transportation. There is no cost to the older adult. However, funding for this service is limited. Transportation services will be provided as long as funding is available.

How to schedule transportation:
Three-day advance notice required. Use one of the following methods to submit a request:
1. Submit a request online at home52.org. Click on Programs and Services and select COVID-19 Vaccination Transportation, or go to http://bit.ly/COVIDRIDE
2. Submit a request by phone: (855) 546-6352
3. Submit a request via email to transportation@home52.org

When submitting a request for transportation, the following information is required:
- individual's name
- individual's address
- individual's phone number
- individual's date of birth
- name of vaccination site
- address of vaccination site
- date and time of vaccination appointment
